YOUR SECURE CHOICE

Web application designed by EBS for Active Guard and Active Track users. **Active View** is a result of the 7 years of experience of dealing with **Active Guard** device. Expanded functionality, easy operation, possibility of adding new functions - is the right answer for customers' worldwide demands.

Active View enables unlimited control over employees and protected objects from any place in the world to be done in real time. All you need is just an internet access. Not needed on site installation, servers IT staff etc.

MAIN INFORMATION ABOUT ACTIVE VIEW

- **Access to data anywhere** and anytime using just WEB BROWSER
- **NO INSTALLATION required** (very fast start-up, no static public IP address required)
- Active View cooperates with EBS devices: **Active Guard** (Real Time Tour System) and **Active Track** (Personnel GPS tracker)
- Application is adapted to work with **MULTIPLE BROWSERS**
- Supported maps: **GOOGLE, OPEN STREET MAPS**
- Users created with **MULTIPLE LEVEL ACCESS**

MAIN FUNCTIONALITY

- **Flexible patrol routes** settings (check points, schedules)
- Processing **alarm events** in real time
- Preview **current GPS position** on the map (Active Track)
- **Preview route on the map** – checkpoint with stated date, time, speed, direction, altitude (Active Track)
- Personnel **staff data maintenance**

NOTIFICATIONS & REPORTS

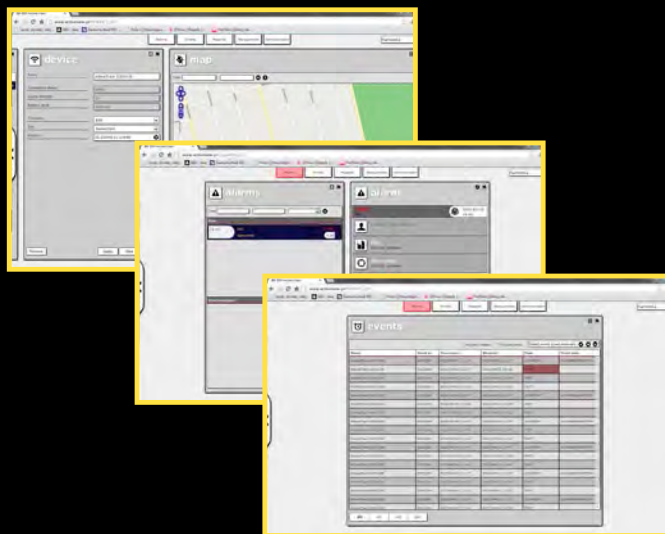

- **SMS and EMAIL NOTIFICATION** about alarms appeared in an application
- Powerful management's **reports in csv format**
- Reports periodically **send by email**
- **Easy imports and exports** data to/from Active View
- **Visual and audio notification** about new alarms

TIME AND ATTENDANCE BASIC FUNCTIONALITY

- Workforce details – information about guards being currently on duty
- Employees identification by RFID cards (the right person in the right place at the right time)

EASY & INTUITIVE OPERATION

- **Integration** with other monitoring software – automatic forwarding alarm events
- **Real-time monitoring** of connection status, battery level, GSM signal strength
- **Easy to operate** application with customer oriented interface
- Application suited to be **easily translated** into other languages
- **Easy adding** monitored objects information
- Possibility of **expansion the functionality** according to the client needs
