

Patriot – Activation Monitoring

V1.00

1. Identifying When There is an Activation

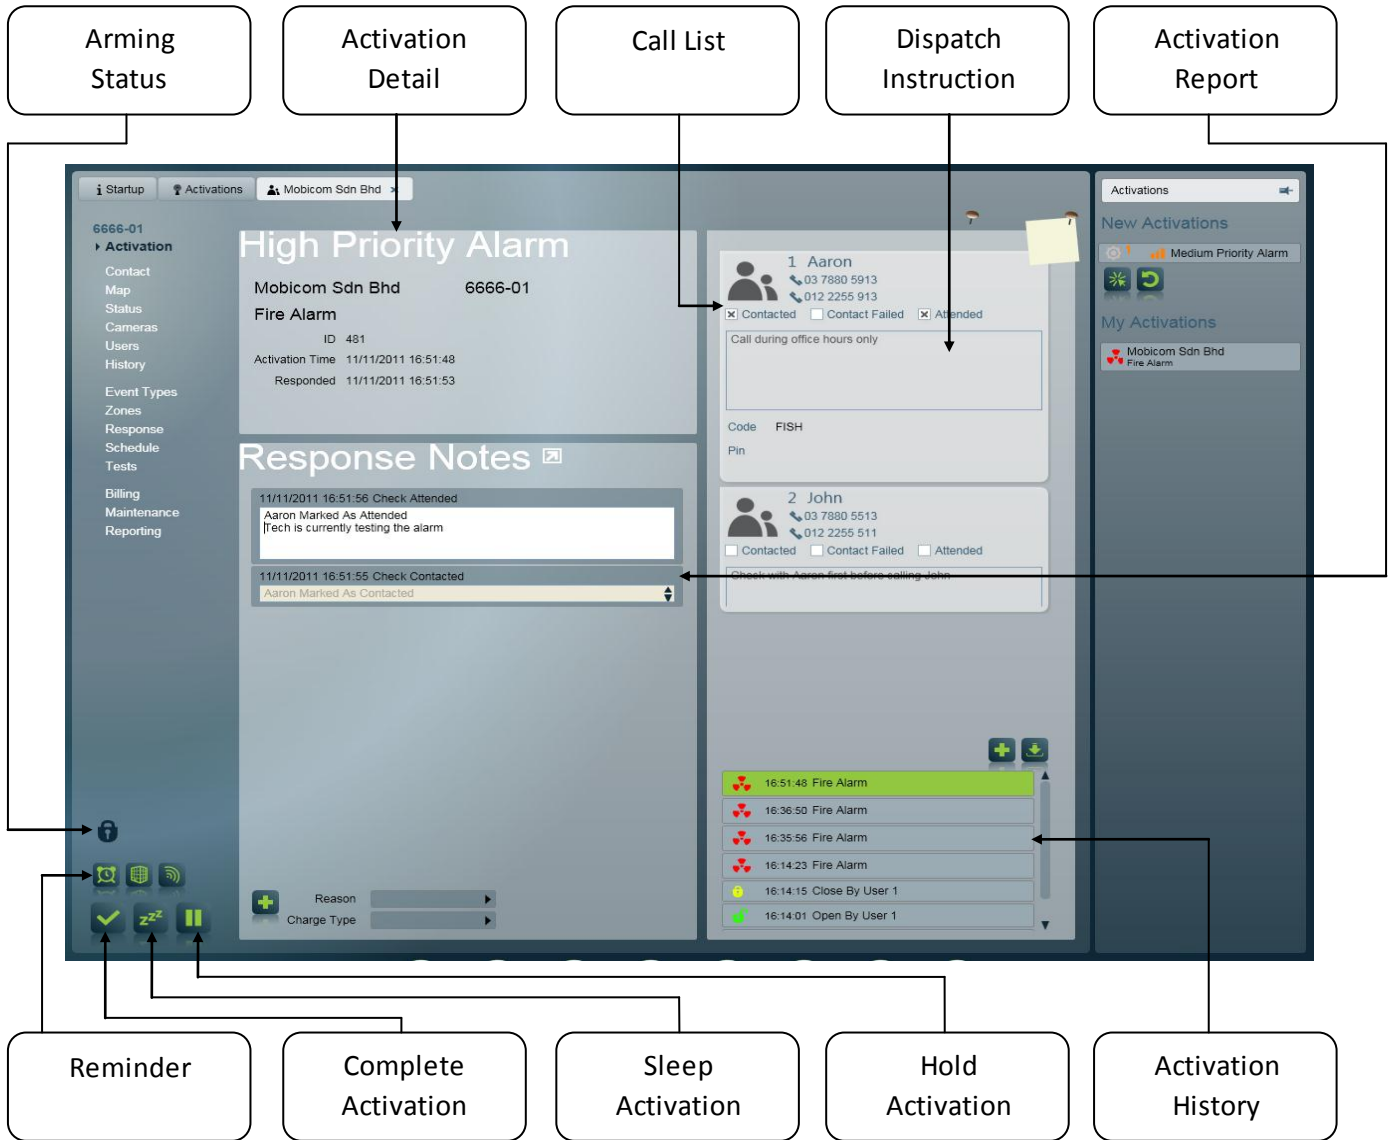

Activation list stored under **Monitoring** (📶) → **Current Activations**.

Hold Activation:	Places selected activation on hold for follow up
Hold Activation:	Remove selected activation from the list
Multiple Complete:	Complete multiple activation in one hit

2. Attending to an activation

Select an activation from the list by double clicking on it.

Arming Status:	Display the current status of the client
Call List:	Users assigned to client. Check boxes are provided to indicate call out status
Activation Report:	The report note sub-section window lists all report notes associated with this activation, such as operator comments and system generated reports of call attempts (time stamped)
Reminder	Set a predefined reminder for the activation
Complete Activation:	Finalize and save activation
Sleep Activation:	Put on hold for defined time period
Hold Activation:	Put on hold for undefined time period
