# MCB Mission Control Board Track and Dispatch Staff

The Mission Control Board works with the MCB Android app to locate and provide interaction between your base station and your mobile staff.

Know where your employees are, who is available, geofence them, send them missions, dispatch them on surveillance tours or visit/delivery itineraries.

Get proof of presence to your customers and enhance your services by sending them documented reports which include pictures and videos taken by your visiting staff.

# Missions, Jobs, Checkpoints, Itineraries, Visits, Deliveries, Pick ups, Tours, etc...

MCB makes sure you know which of your employees are available and dispatch them where you need the job done, no matter how you call this job.

You can prepare itineraries for scheduled work with both **MCB plug-in for SECURITHOR** or the stand alone version **MCB Go!**

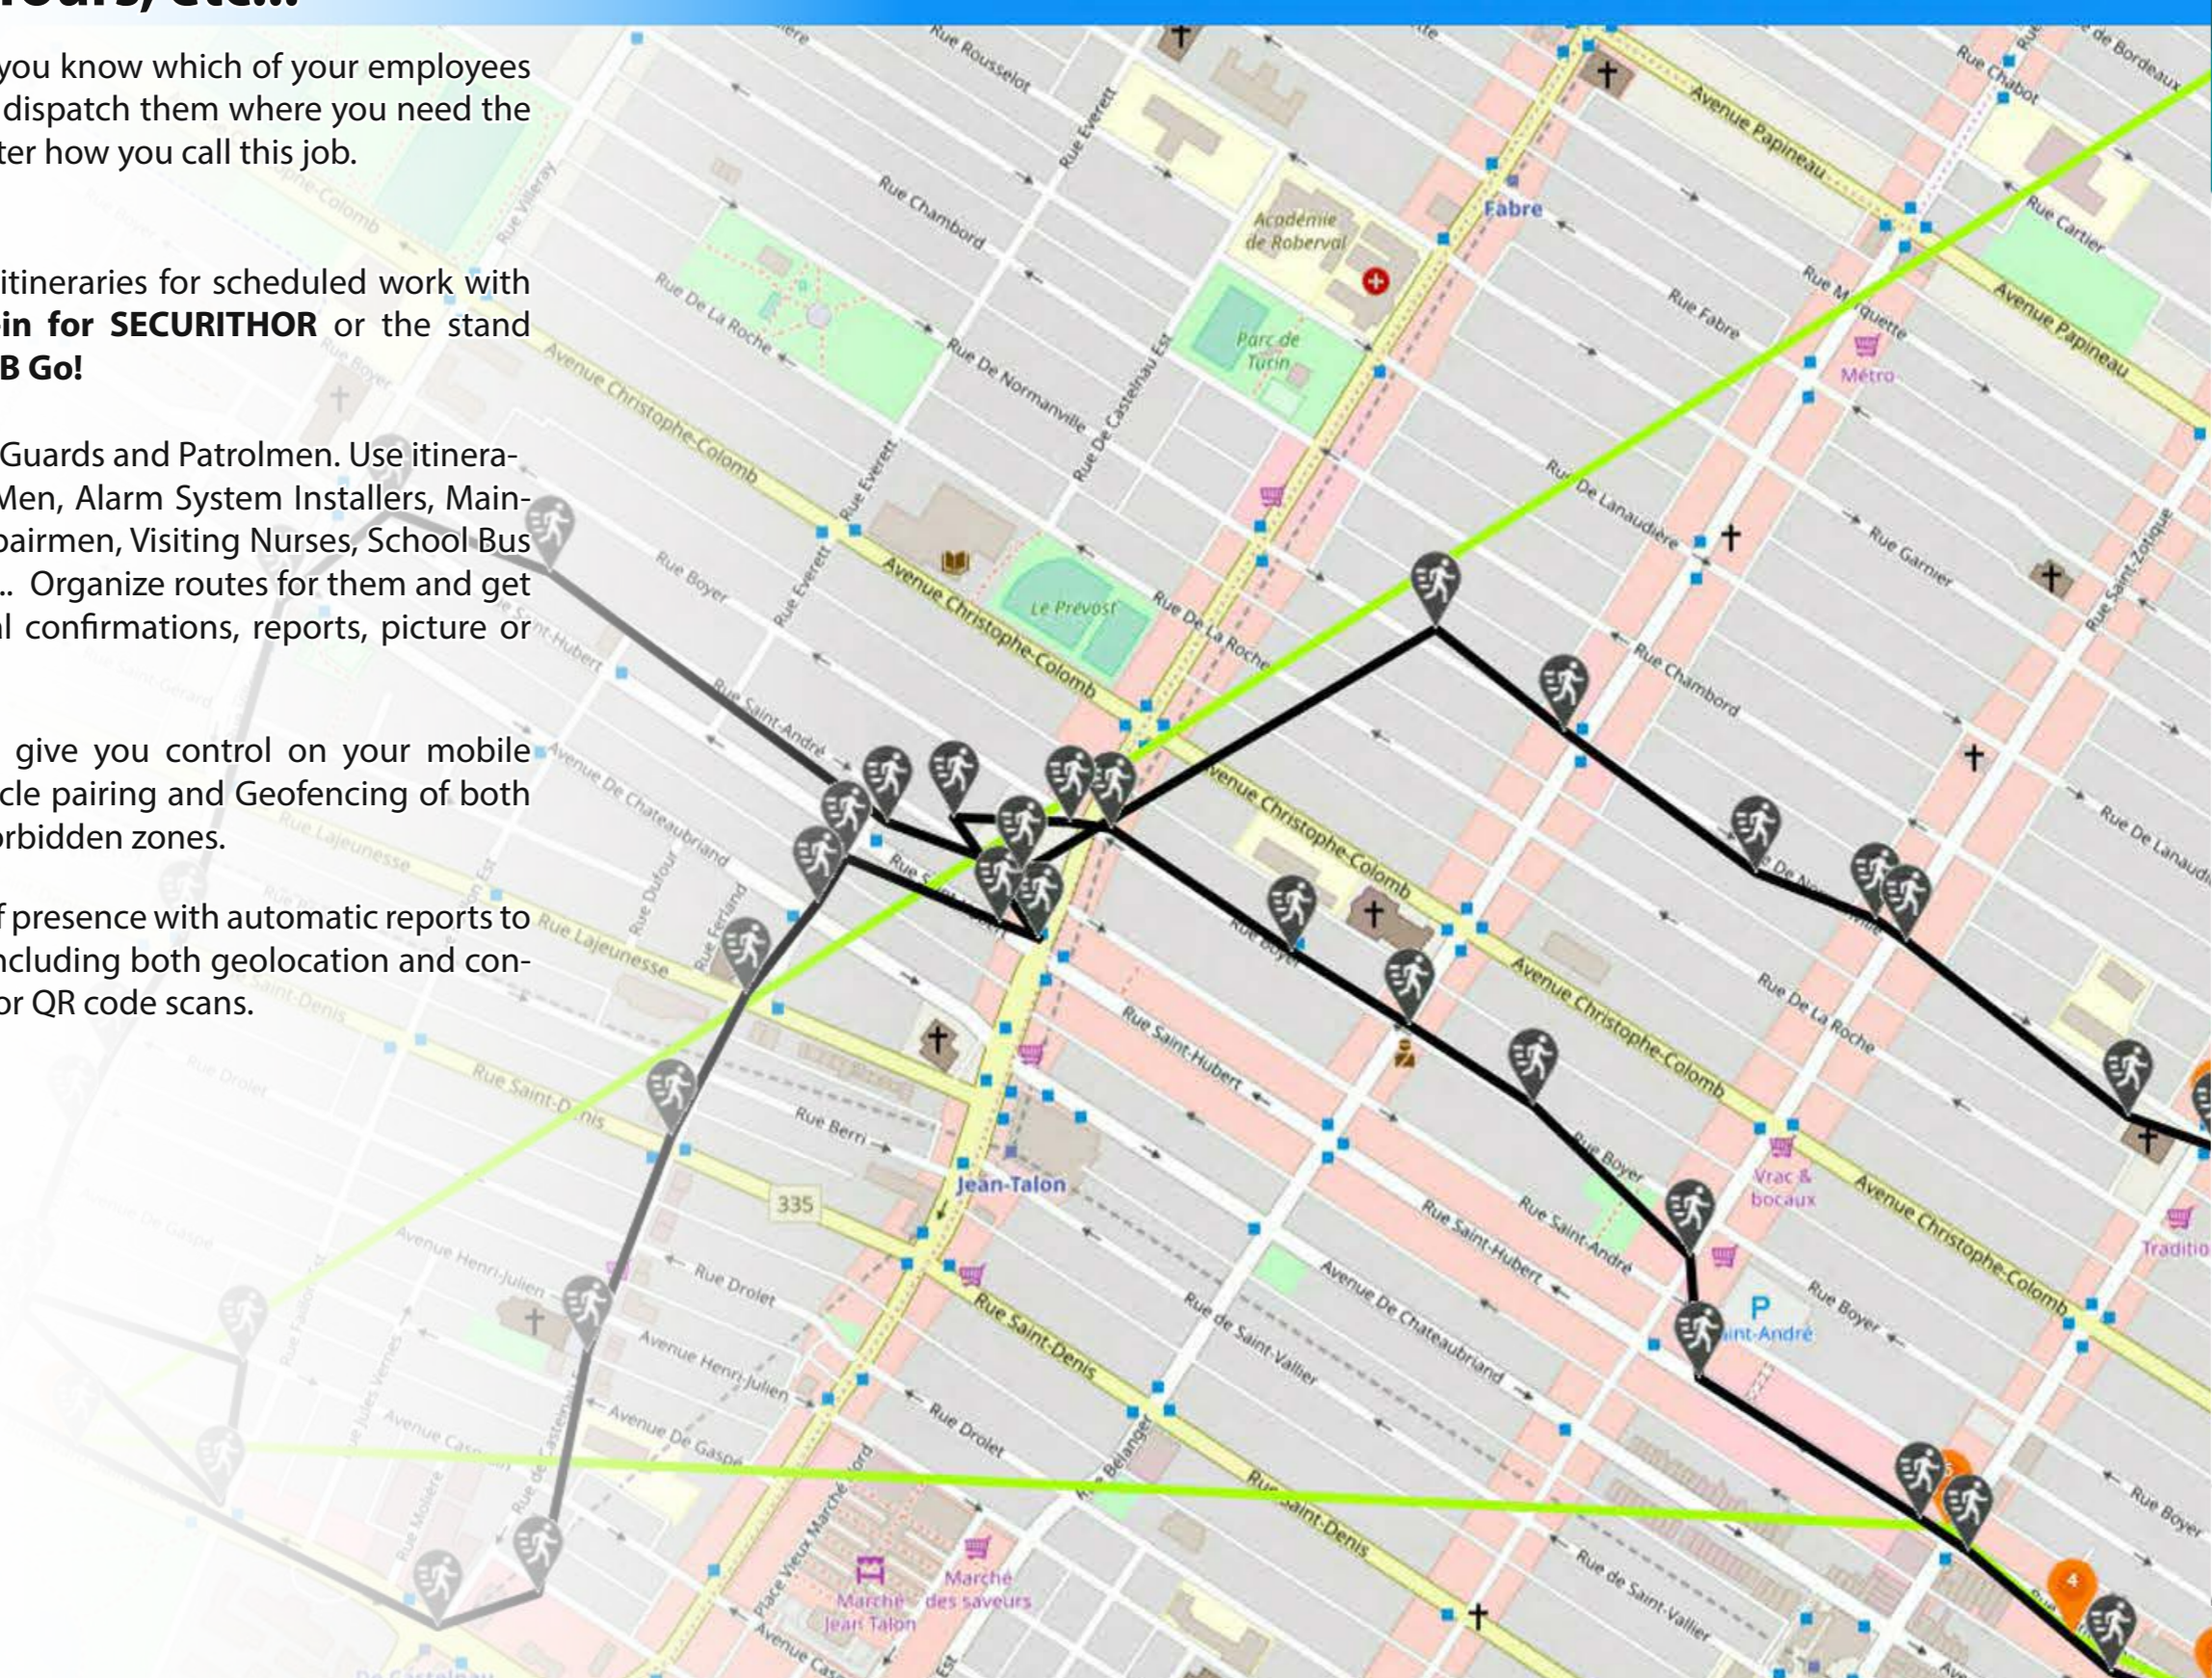

It's not limited to Guards and Patrolmen. Use itineraries for Delivery Men, Alarm System Installers, Maintenance Staff, Repairmen, Visiting Nurses, School Bus pickup routes etc.. Organize routes for them and get checkpoint arrival confirmations, reports, picture or video proof.

Multiple features give you control on your mobile staff such as vehicle pairing and Geofencing of both authorized and forbidden zones.

Confirm your staff presence with automatic reports to your customers including both geolocation and confirmation of NFC or QR code scans.

Report of Samedi by Sheldon Cooper

Started: 1:39 AM Ended: 2:48 AM Status: Completed

23:38

# The MCB app

MCB is the multi tool your mobile staff needs. It does much more than a guard wand! It's the vital link between your base station and mobile staff.

MCB app is not just a tracker for your staff. It's a way to communicate missions, itineraries, and get your staff reports which include videos and pictures.

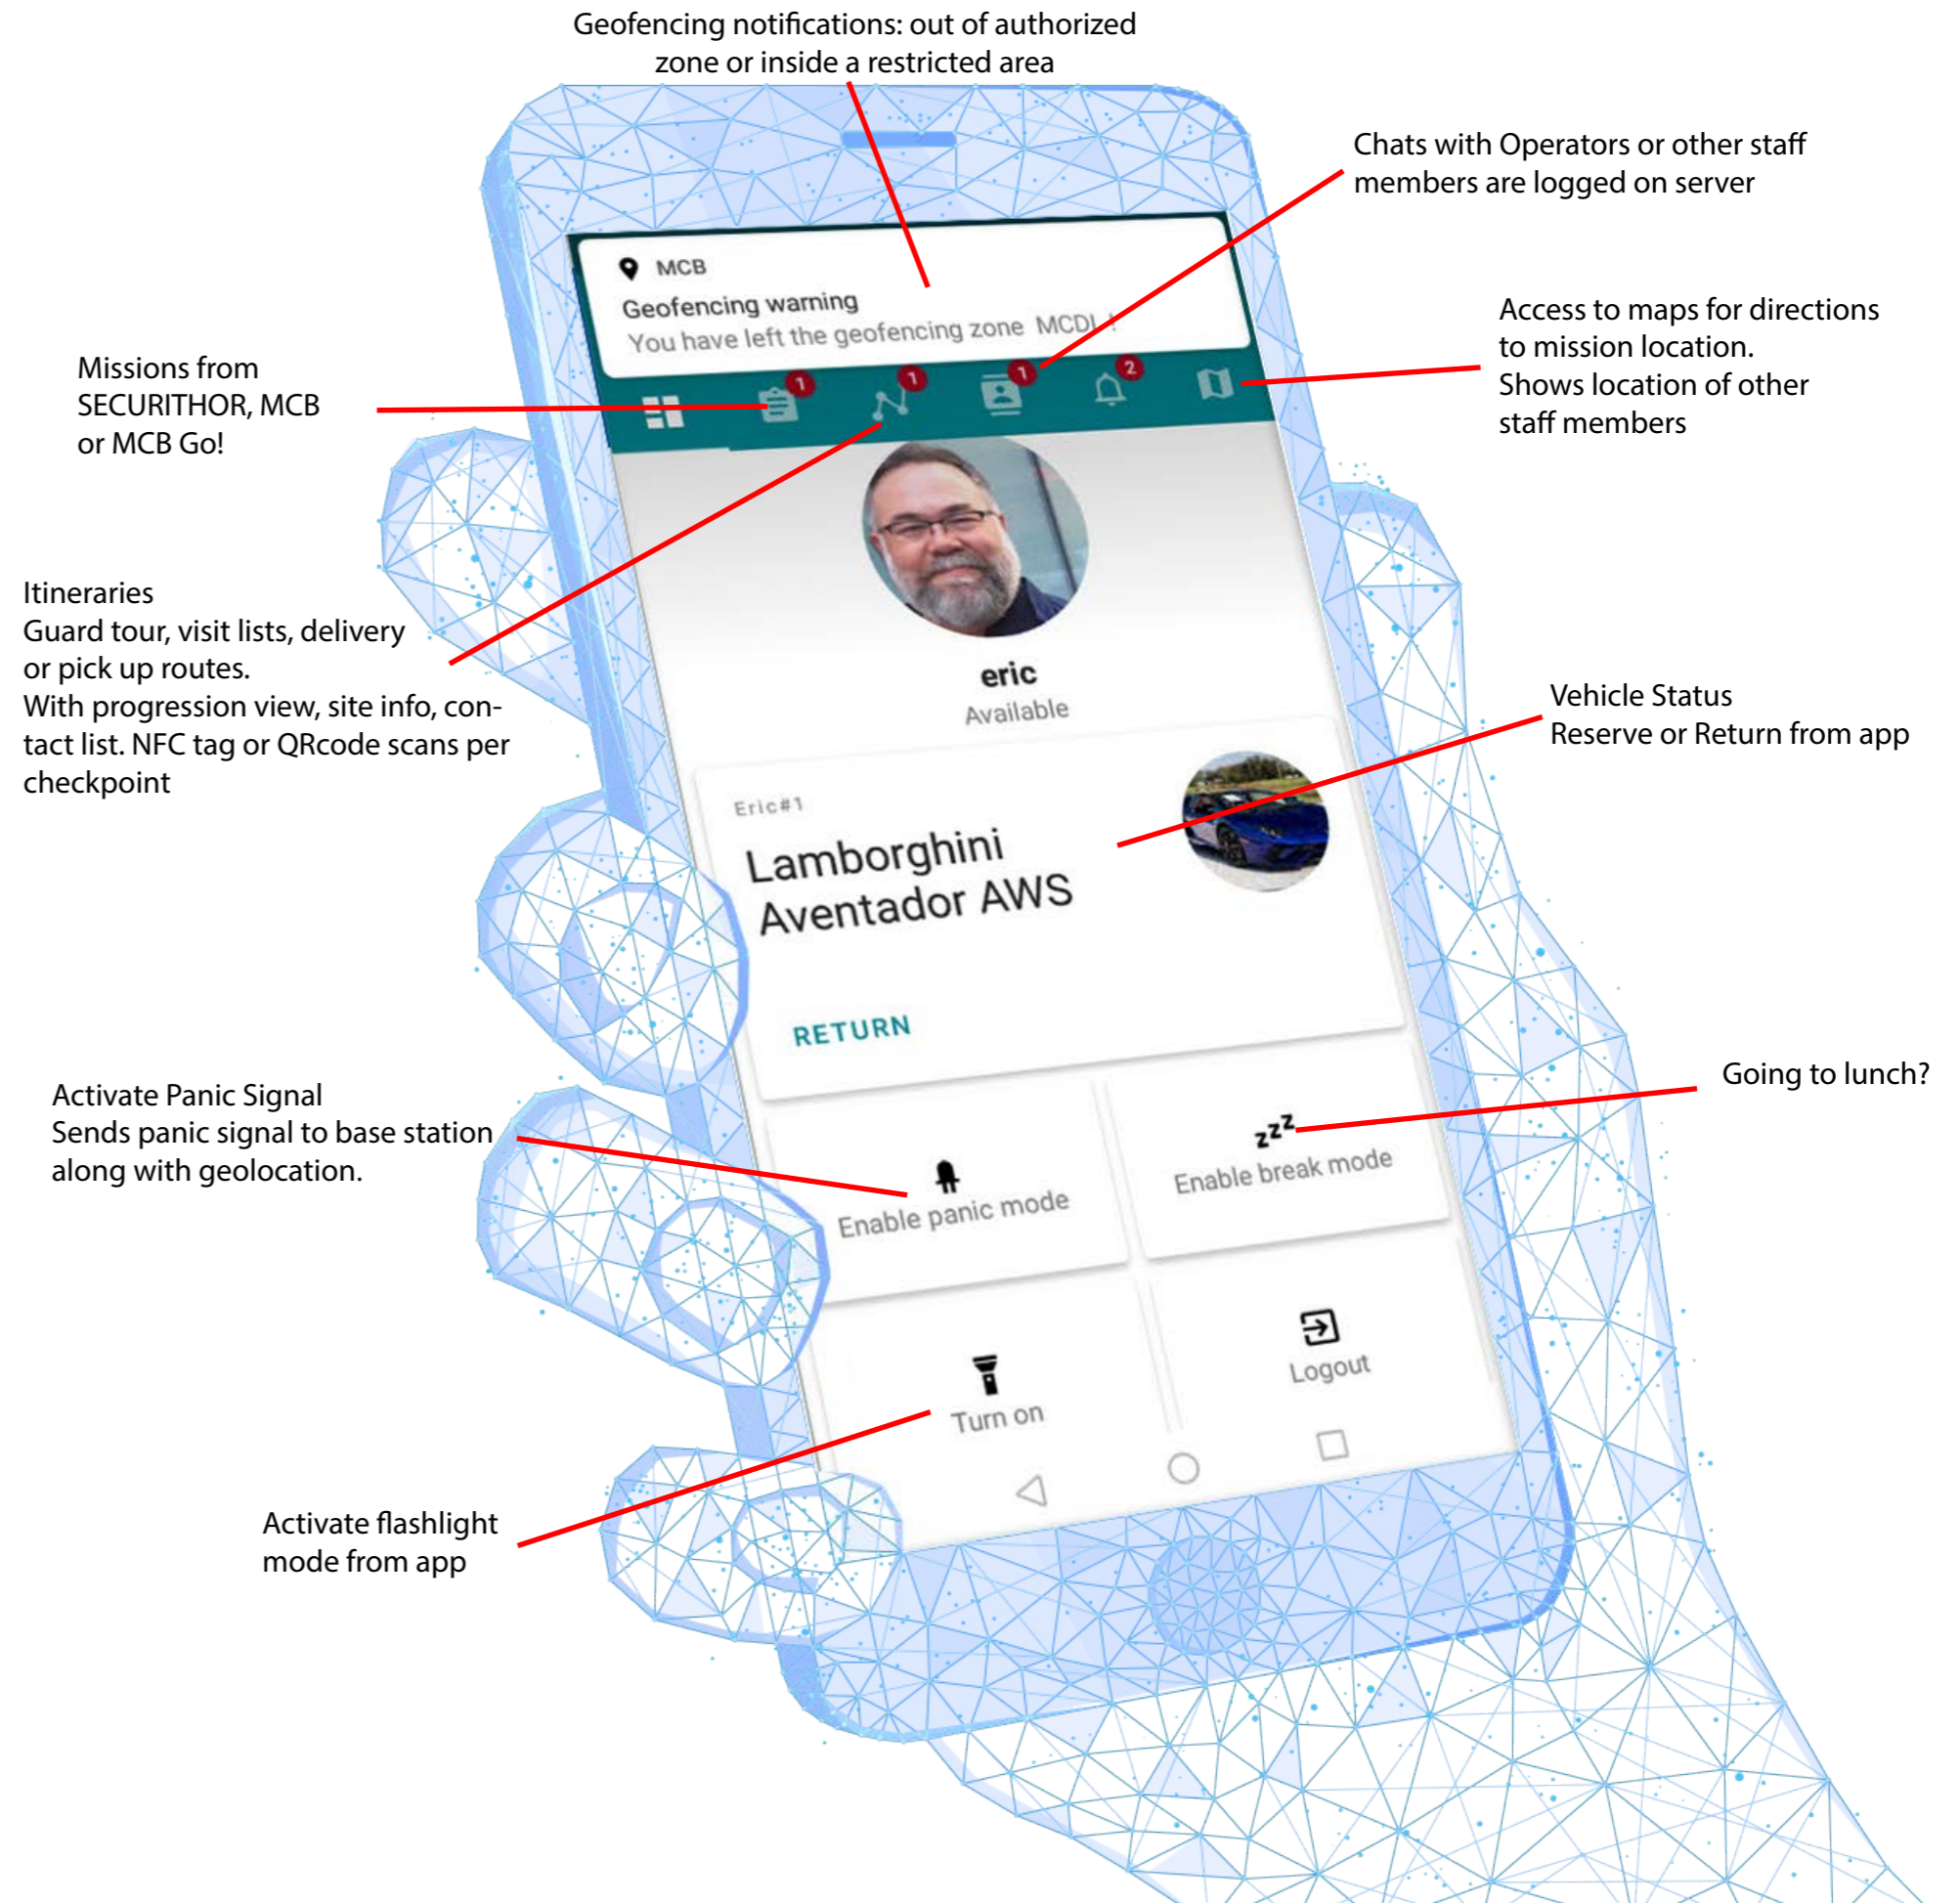

Connect up to 200 staff members to MCB by using the free MCB Android app.

Your Crew uses the MCB app to scan NFC tags, barcodes or QR codes for double confirmation of presence at visited site.

## Languages

MCB app is available in English, Arabic, Español, Filipino, Français, German, Greek, Hindi, Indonesian, Malaysia (Bahasa), Norwegian, Português, Romanian, Swedish, Ukrainian and Vietnamese. Contact us to add languages.

# Not only for Guards and Patrols!

Every company with mobile staff can use MCB.

MCB for SECURITHOR and MCB Go! will work for all your Mobile Staff no matter if they are doing pickup routes, school bus runs, delivering medication, equipment servicing, customer visits, building management, cleaning offices or security interventions.

Simply track your employees with the MCB app in their Android phone. View where they are on the map and send them jobs, either on demand or on schedule.

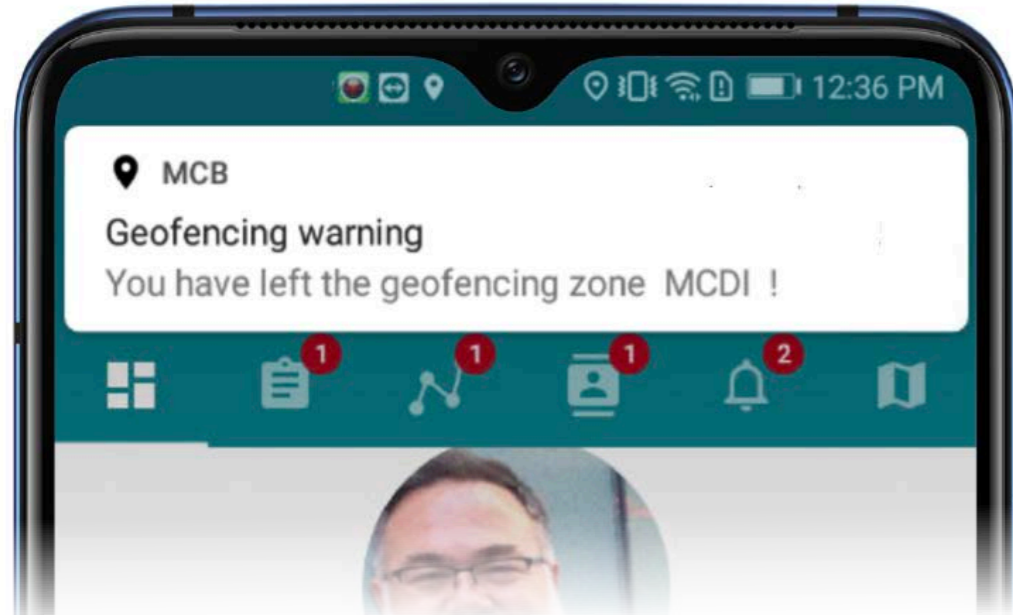

**MCB Go!** is designed to manage your mobile staff and does not need job transfer from the SECURITHOR Monitoring Software. It works completely stand alone without the SECURITHOR Monitoring Software.

Minus the alarm event transfer, MCB Go! has the same functionalities as the SECURITHOR Plug-in: track employees, send them missions or itineraries and get their confirmation of presence. Plus it also uses the same free MCB and TCB apps.

All the geofencing, QR code/NFC tags scanning, vehicle pairing, Reports with pictures/videos from staff are present in MCB Go!

# Where's W . . . . ?

geofencing notifications appears when entering a forbidden zone or when leaving an authorized one.

## GEOFENCING: IN OR OUT

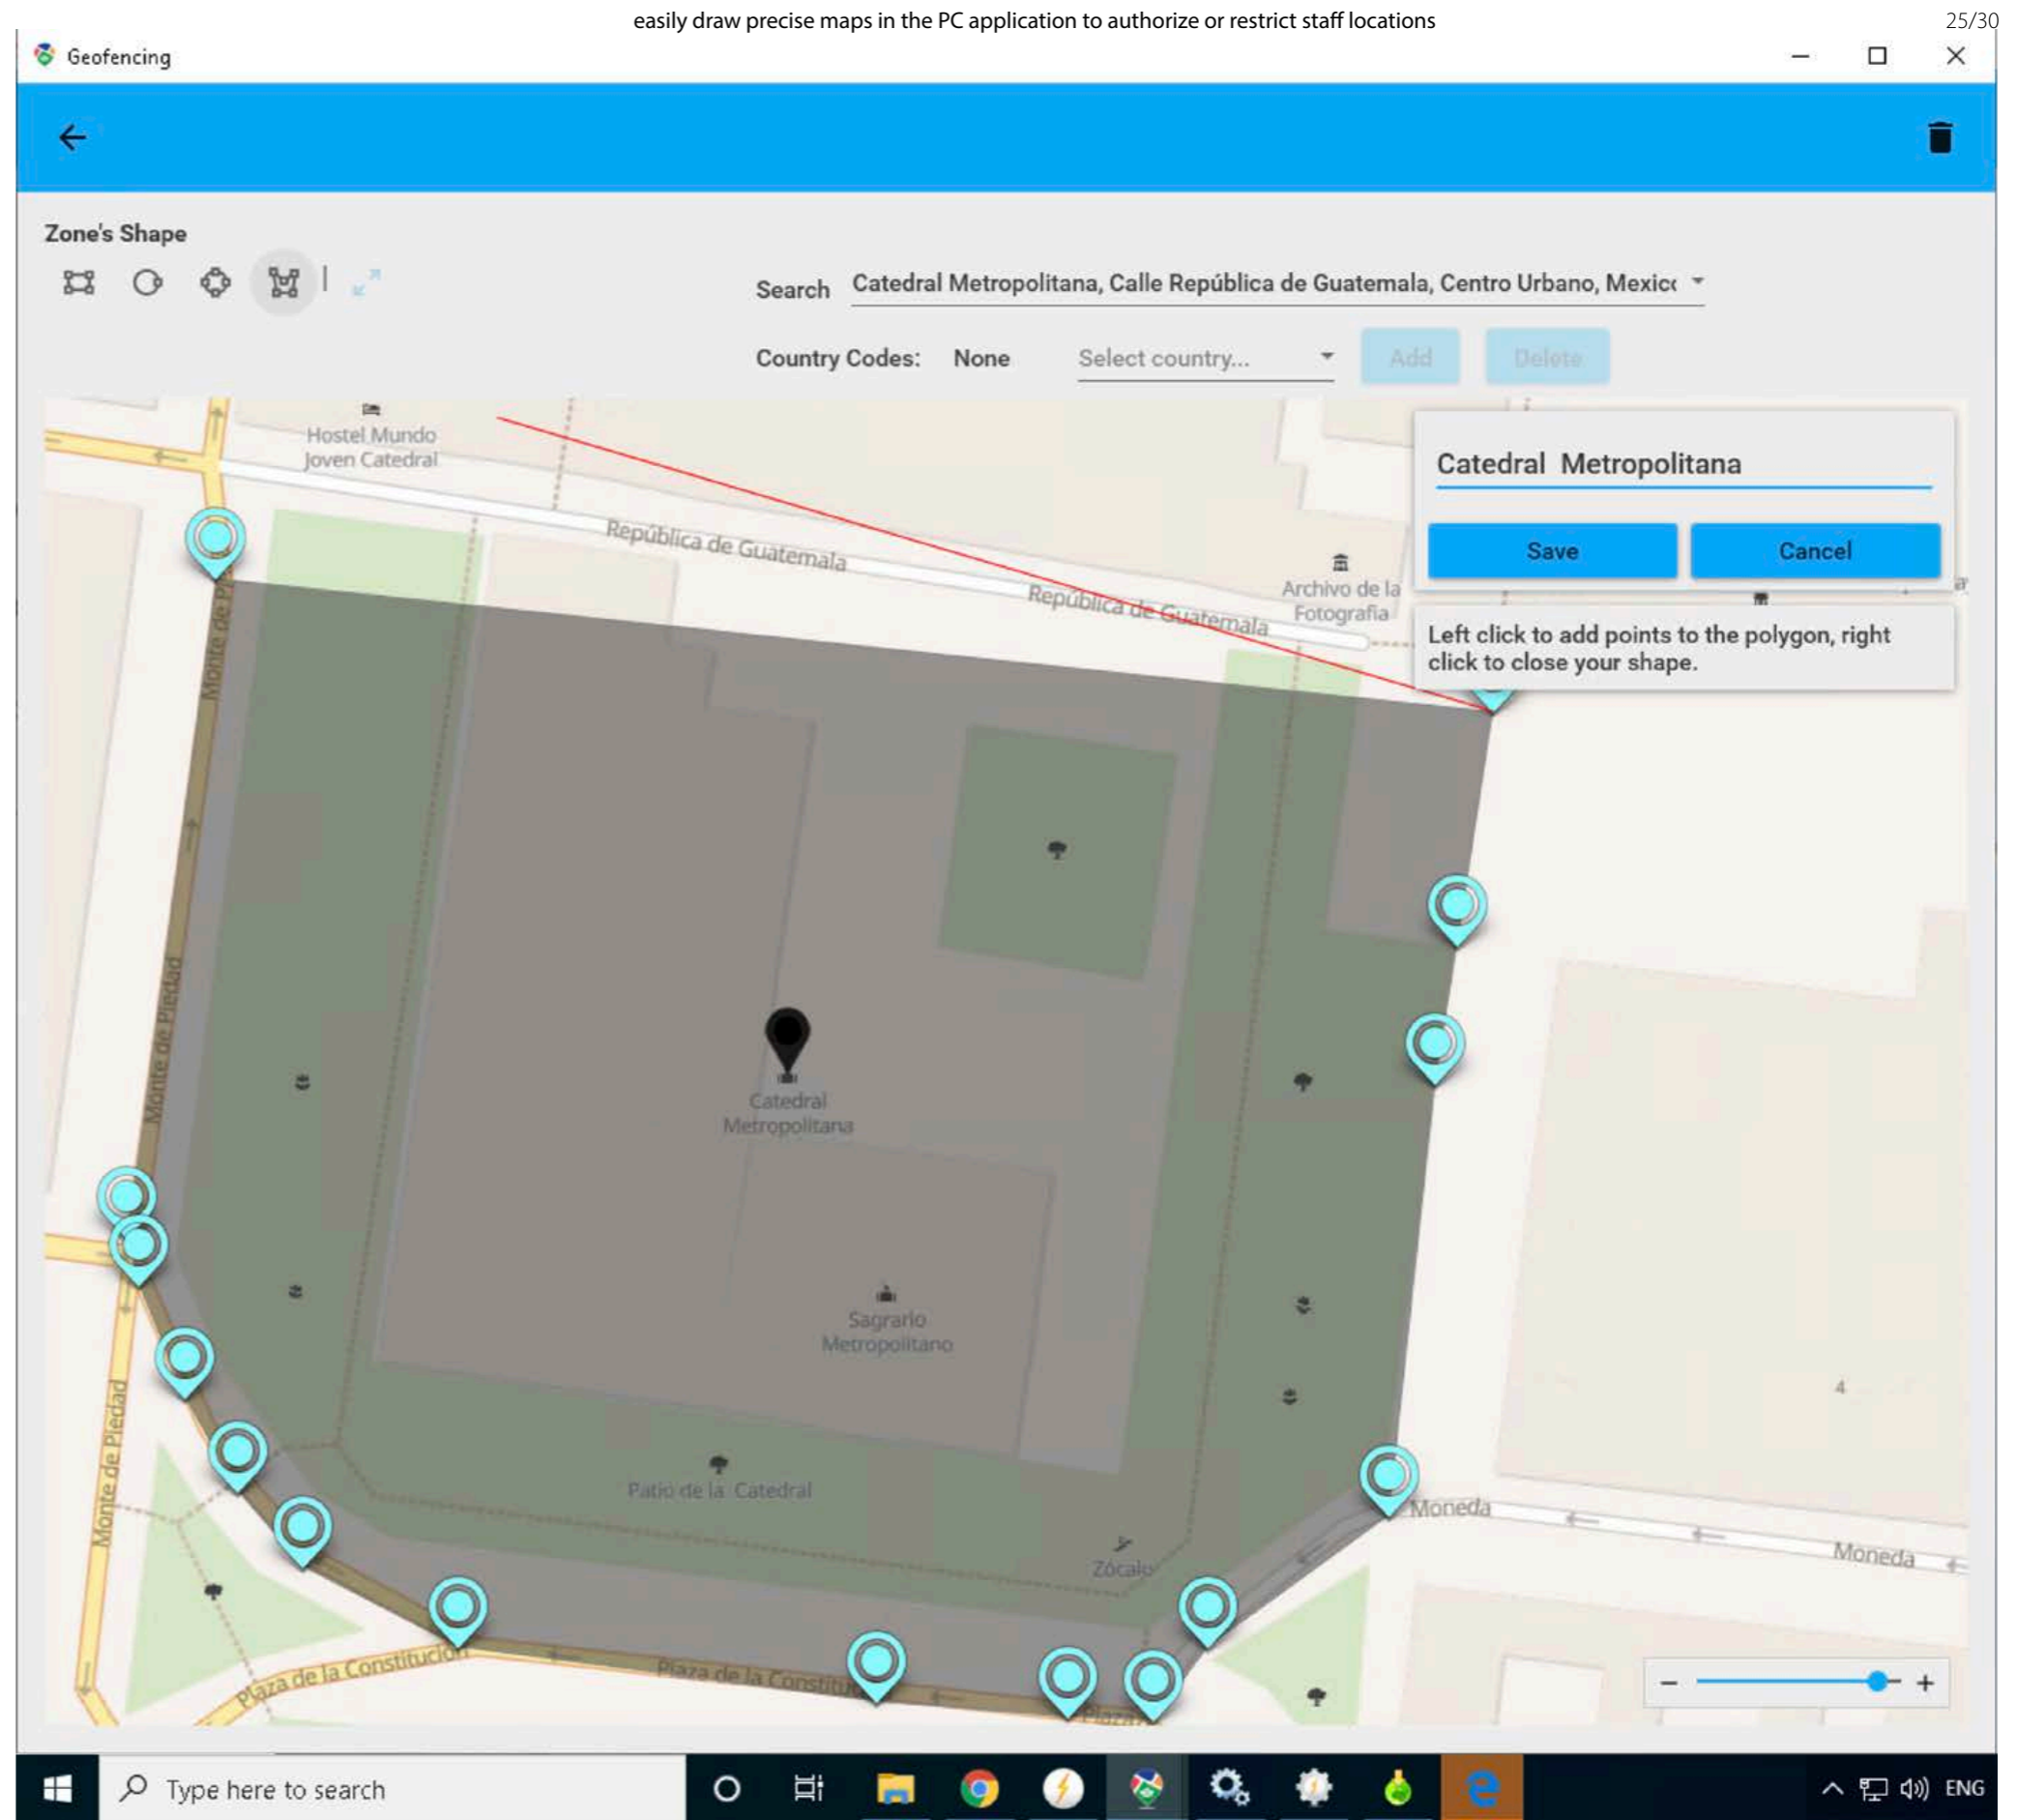

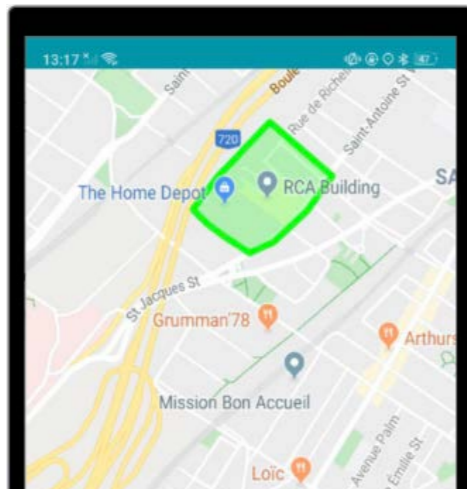

Draw zones on a map to assign staff members to a location. You will know if employees arrive on time and if they stay at their posting. Both base station and staff know because they get notifications when one steps out of an authorized zone.

Select forbidden zones to prevent unauthorized visits or to enforce allocated territories. Both type of geofencing are easily set on a map with drawing tools.

Forbidden zones show clearly in red

Authorized zone in MCB app shows in green

# I'm here!

Prove your service provision to your customers by automatically sending visit reports (email or sms). Reports include geolocation data, staff report with on site pictures and videos.

Double your proof with QR codes or NFC tags scanned at checkpoints or delivery/pickup sites. They are included in the email/sms report that is sent to the customer or supervisor.

### Need to know

- who was where at midnight?
- where did your staff go today?
- who was the nearest to your customer at 13h00?

You can find this information in MCB and offer a proof of presence to your customers.

### Confirm presence with MCB

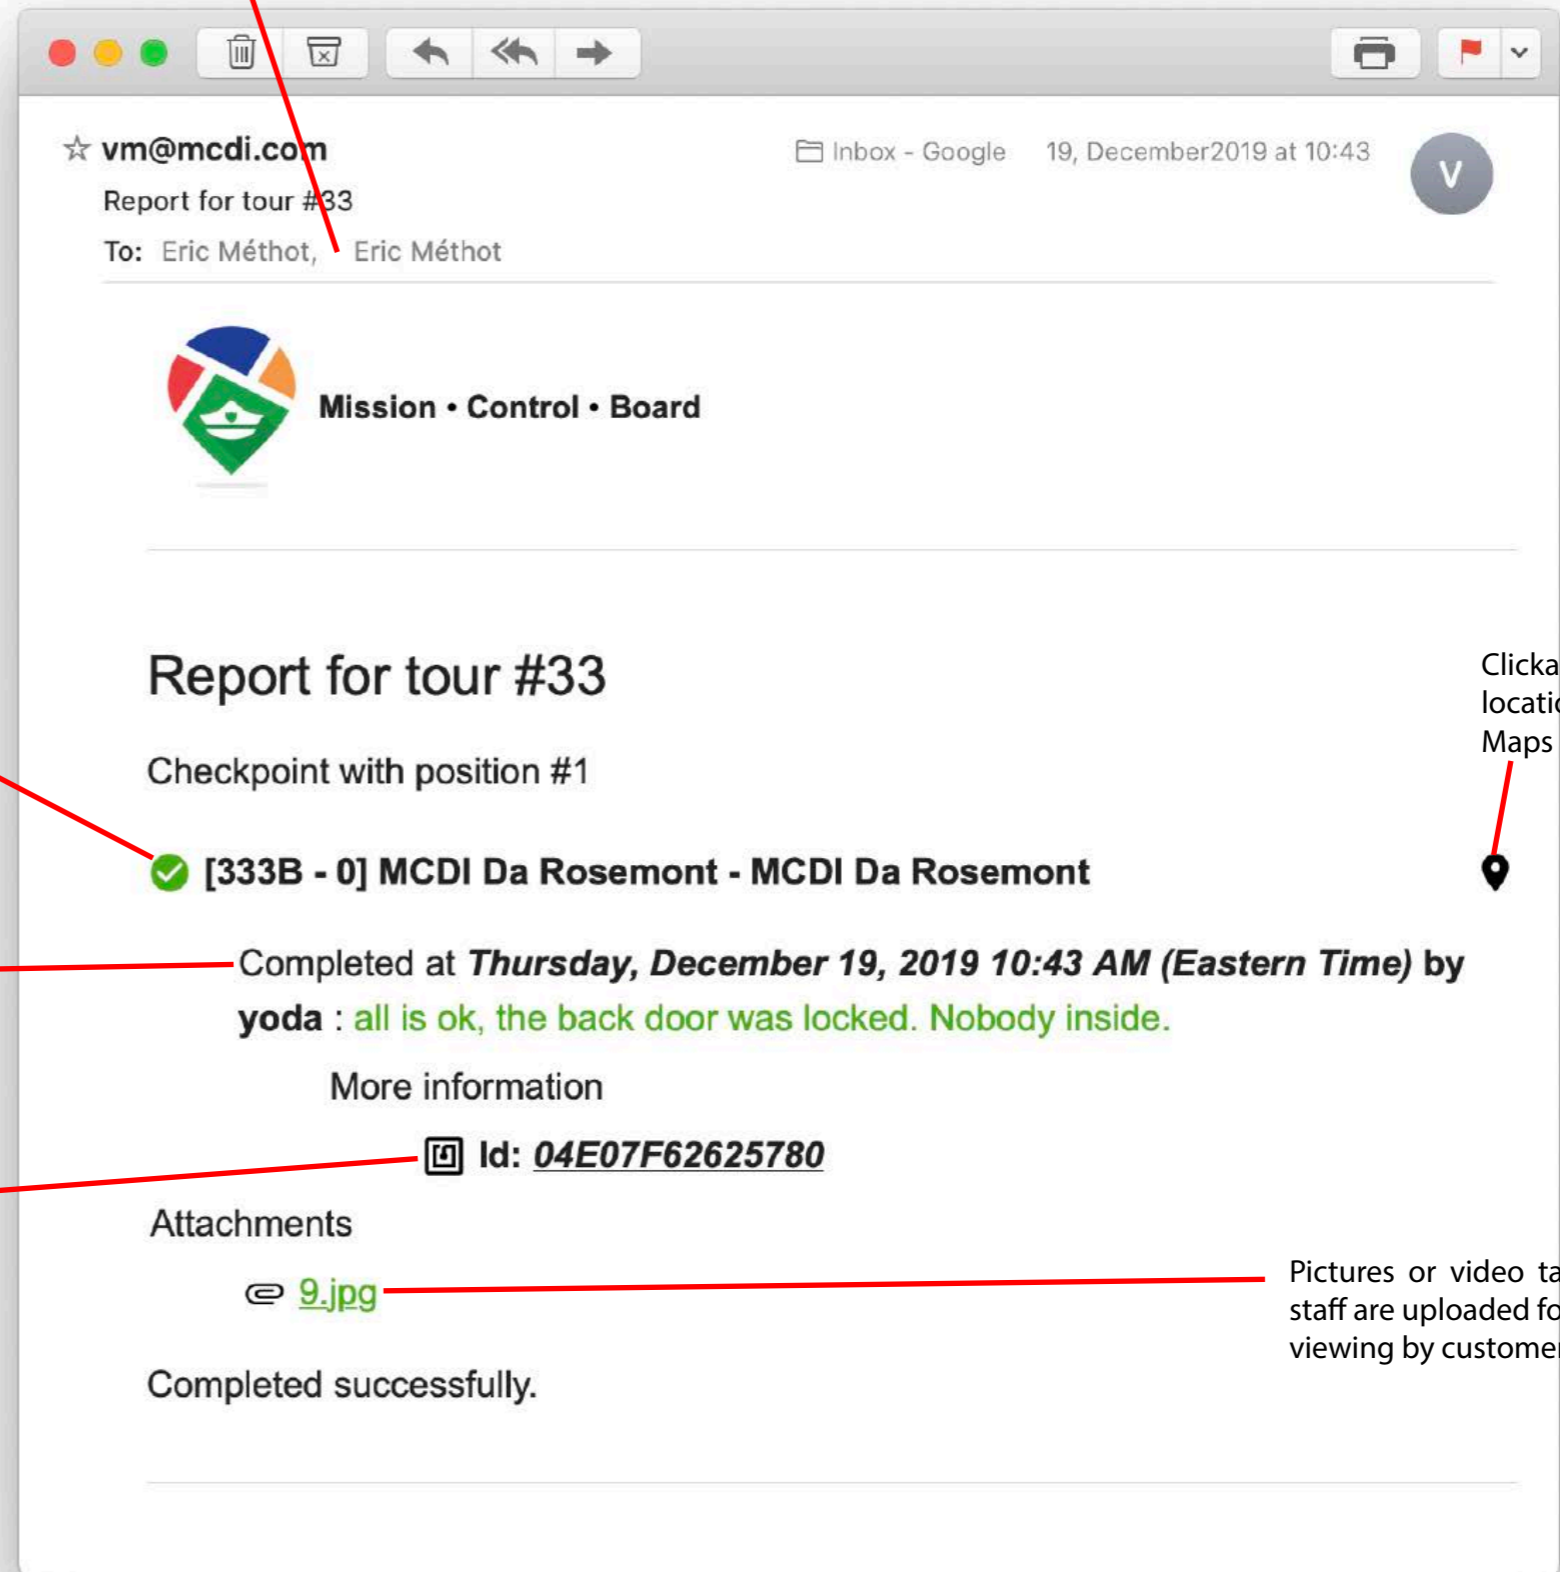

Each staff member is tracked along his journey. No matter if it's on the way to a Checkpoint or when scanning a tag. You can query their route to a location or get their location at a specific time. Place NFC tags to confirm your staff presence at checkpoints or on equipment to service.

### Email or SMS visit reports

MCB will send an email each time a checkpoint visit is completed. Use this feature to send a quick report to supervisors or customers. Email confirms location, report written by your staff, which NFC or QR code was scanned along with a link to view picture or videos taken by staff at the checkpoint location. Best way to prove your services!

Select as many addressees as you like. Reports are sent by email or SMS

Reports are sent seconds after completion of the checkpoint visits or cumulative at end of itinerary

Identification of the Checkpoint. Green checkmark confirms the visit is successful

Time of completion with report entered by your employee

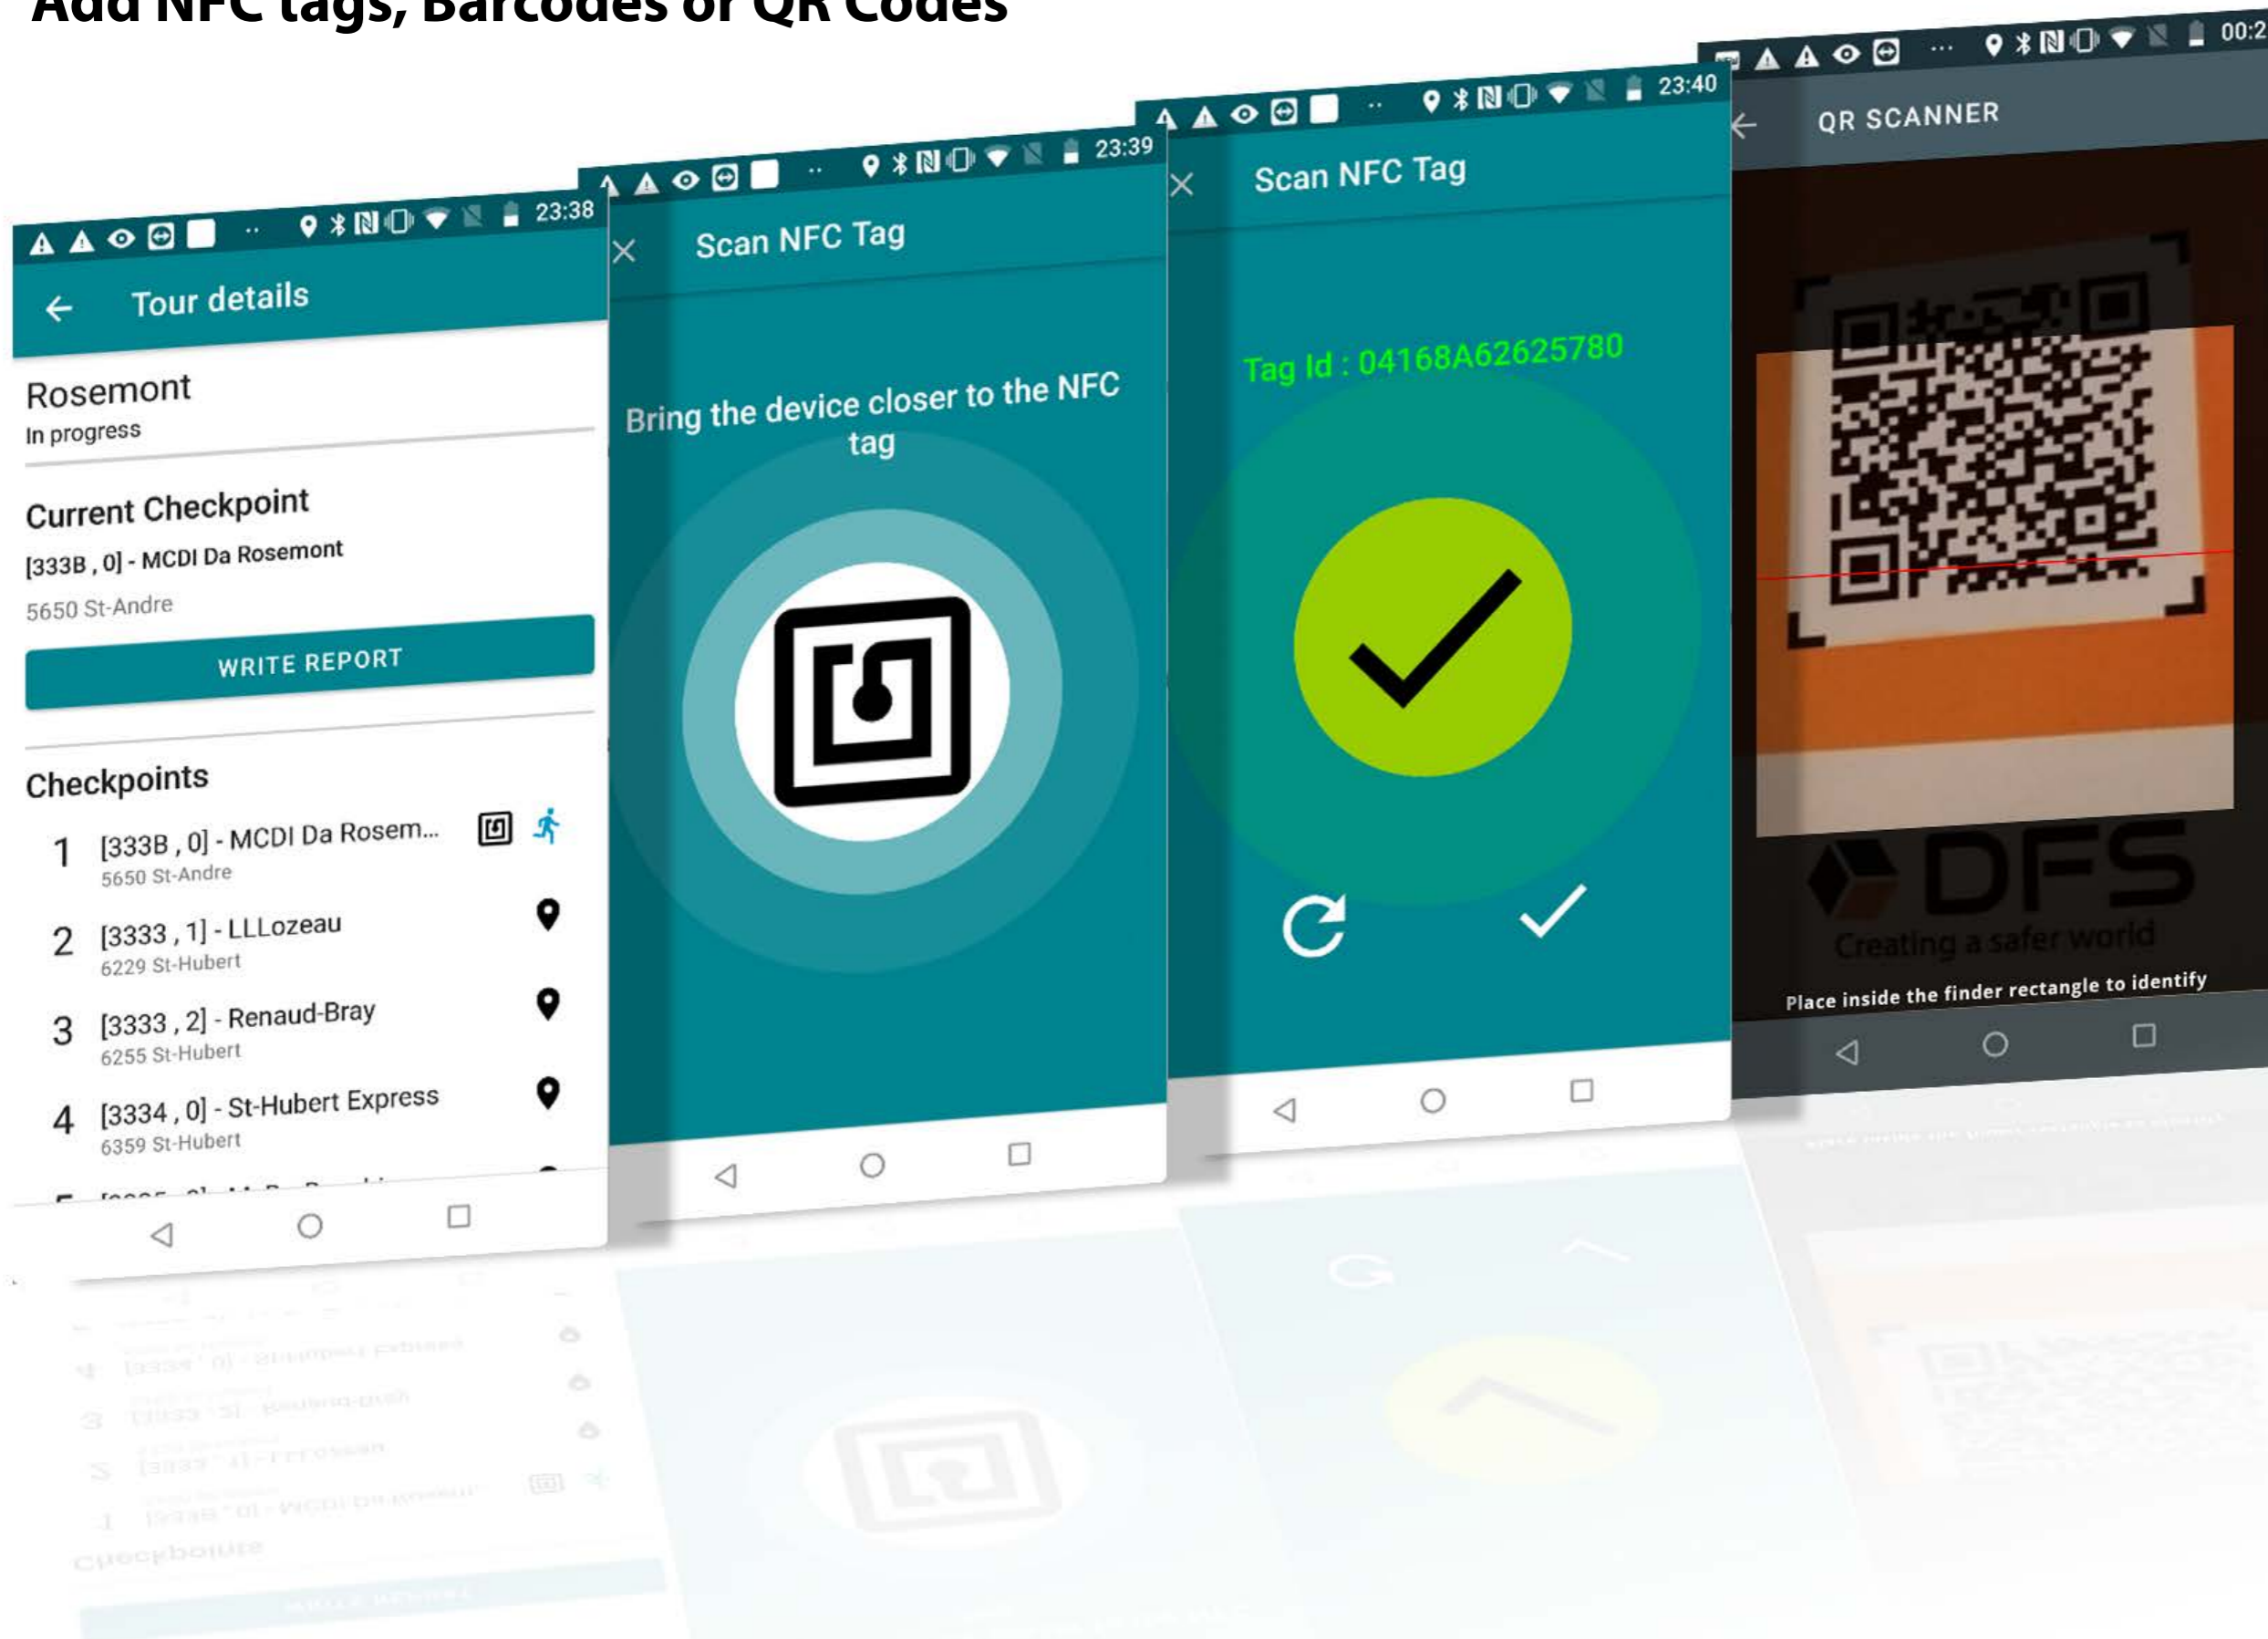

Icon shows tag type (NFC or QR) with it's own designation.

Clickable link. Opens location in Google Maps

Pictures or video taken by visiting staff are uploaded for online viewing by customer.

# DOUBLE VERIFICATION

## Add NFC tags, Barcodes or QR Codes

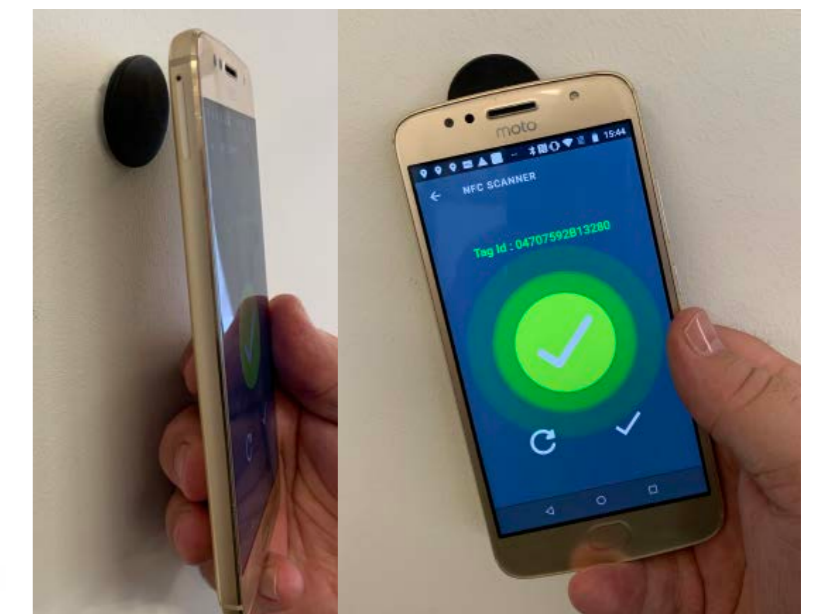

Place NFC tags, barcodes or QR codes to confirm your staff presence at checkpoints or at equipments to service. You can also request in-app signature from customers.

Using their phone and MCB app, staff members are required to scan NFC or QR. This makes a double verification added to the geolocation recorded.

Scanning a tag insures the employee goes to all floors or visits every room required in a tour. It also forces staff to go to the end of a room or verify a back room. Stay duration at site are also enforced by MCB app.

Scanning a tag affixed to equipment confirms the machine been worked on, a delivery site, a pick up site.

# Software Assurance

Get expert assistance for your SECURITHOR, from the makers

**SECURITHOR** and **MCB Mission Control Board** are key parts of your business and MCDI, the maker of your SECURITHOR delivers expert assistance.

No one can troubleshoot and work faster in your SECURITHOR than the experts that made it. No matter if it's for routine maintenance or for getting you back on track in case of an emergency.

With over 25 years of developing, maintaining and supporting software worldwide, we can be as effective as having an engineer on site.

Plus our support coverage plans are the only way to get updates that bring you not only conformity to a changing environment but also new features coming with each update. This ensures your Alarm Receiving Centre stays up-to-date and competitive.

## Sometimes it takes more than just turning it on and off again

### What's included?

#### Maintenance of database

You would not drive your car without periodically changing the oil? Maintenance of your database is as important. Your database is a living thing, growing with each account you add and with each alarm signals. Operations such as vacuum, resizing, archiving, splitting, and SQL updates are important to keep your SECURITHOR and MCB Mission Control Board applications performing at peak level. These operations are all performed as part of the support coverage.

#### Software updates

Updates are a key part of the support coverage plan and guarantee you will be running the latest version of SECURITHOR. With each update, we provide new features and also revise old ones to make them better. We also adjust the software when environmental changes are needed such as Windows updates and security patches. Each major update brings at least 20 new features and improvements. New integrations of manufacturers are all parts of updates either in core Securithor or add-modules.

#### More training

On SECURITHOR and MCB: for your operators, your supervisors or for your sysadmin. We tailor training to your needs.

#### Consultation

For configuration, usage, expanding or adding new features or services.

#### Troubleshooting

Sorting out communication with new receivers or new types of devices. MCDI staff has over 25 years of experience working with receivers, servers and security devices.

## Emergency help and disaster recovery

SECURITHOR and MCB are often a key component of your business and no one can get you back on your feet faster and better than MCDI. Avoid wasting time with administrative delays. Having a support plan is the only way to get immediate help,

No matter if it's a failed hard drive or if you need to re-start at an alternate location, we can help. Knowing that expert assistance is available if you need it will give you peace of mind and the assurance you need for business continuity.

# SPECIFICATIONS

## DT42/DT42m

Alarm receivers
DT42ip receiver, alarms over IP
DT42ipm receiver, alarms over IP and phone lines
DT42gb receiver, alarms over IP + Guardbooth features
DT42HV High Volume IP receiver (special projects only)
Power supply: 100-240V AC input 50-60Hz, output 5Vdc 2.4A
Consumption:
DT42/DT42gb: typical less than 1.1A 5VDC
DT42m/DT42gbm: typical less than 1.2A 5VDC

Communication:
DT42gb: Ethernet, USB, serial
DT42m/gbm: Ethernet, USB, serial, pstn

Dimensions:
5.720" L x 5.750" W x 1.635"H (excluding connectors and rubber feet)
Rack-mount width 19 inches, height: 1U, 6.5 in deep
Finish: bright orange enamel, black serigraphy.

Android app: 8+ with notifications enabled. Access to Google Notifications

Verify connection details with MCDI as they can vary by model within the same brand. Ports opening and forward to DT42 according to alarm formats and usage. Number of sites supported varies according to reporting frequency and encryption level. Consult with MCDI for more information.

**Memory** 12,000,000 events stored in DT42. Equipped with a removable micros SD card for logging. Logs can be downloaded to PC over ethernet.

**Languages** Configuration interface in French, English, Portugues, Spanish, Swedish

**Warranty period**

DT42 is backed by MCDI SP 2 years limited warranty. Programming updates are free during the warranty period.

DT42 is reporting in standardized formats to most Automation Software on the market including SECURITHOR V2, SECURITHOR V1, WinSAMM, SAMM, A-traq, Bold Gemini, Bold Manitou, Central Works, MAS, Microkey, Patriot, SIS, SIMS. Direct IP connection to third party software available with supplied component.

DT42 reports to Securithor 2.31+ in MLR2/2000 with SIA extended blocks.
DT42 specifications are for version 2 and for units shipped as of May 2019

### MCB Mission Control Board 2.40

As a plug-in for Securithor or stand alone module MCB Go!

**MCB Mission Control Board**

Workforce Track and Dispatch.

Configurations:

MCB as a plug-in for Securithor: 10,25,50,100 users

MCB Go! Stand alone application: 25,50,100 users

**Technical requirements**

MCB Android app 10+. 100MB space. GPS capacity and Internet connection for communication to station.

Bandwidth according to size of information transferred.

Station requirements (PCB application, staff of 10, no other application sharing PC with PCB to the exception of SECURITHOR FOR MCB plug-in):
Minimum for trial: i3, 4GB ram, 10GB HDD for installation.
Hostname or static IP. One port dedicated and forwarded to PCB PC
Bandwidth according to size of information transferred.

Contact MCDI for production requirements as they vary according to usage and number of connected staff.
Compatible outgoing mail server and ftp space for checkpoint notifications.

NFC tag use requires compatible phone with NFC reader and compatible NFC tags. QR code scan requires compatible phone with camera and Android QR code resources.

MCB app uses phone's gps-a system for geolocation and geofencing. Must be enabled at all time preferably with fine location enabled.

Internet connectivity and link to MCB Server must be insured at all time for optimal use. Some feature might not work without internet connectivity.

Phone's camera use requires accepting relevant permissions. Some feature may not apply to all phones or tablets.

Geocoding and Display of maps require maintaining a Securithor support plan.

## SECURITHOR MONITORING SOFTWARE

**version 2.40 and over**

**Configurations**

Single PC:

STL Starter kit

ST1 SECURITHOR V2 one station, unlimited accounts

NETWORK EDITION:
STS Server license
STWx Workstation license according to number selected.

### SECURITHOR Add-on Modules (options)

**APS X Assistance app for iPhone and Android.**
Compatible with Android 7+ and iOS 10+
Individual phones not supported.
Functions of the iOS and Android apps differ due to Apple privacy policies. Some functions are not available on iOS

Bluetooth button offered as recreational or convenience purposes. Range and connection according to Bluetooth environmental capacity at site of use and characteristics of phone and battery capacity.
Geocoding and Display of maps for Rendez-Vous, APS signals and Panic from MCB requires maintaining a Securithor support plan.

**CAM/CAM Premium**

STL: CAM and CAM Premium are options

ST1/STS: CAM included, CAM Premium as option

**CAM module**

Devices to ST: Hikvision, Dahua, EPCOM
Automatic opening of provisioned video feed with pre-alarm
Video feed recording.
Audit trail for activation without prior alarm signal.
Screenshot on demand for MCDI Viewer.
Control of zoom, iris, focus, ptz, 2 way audio, relays (when applicable)
External jump http link, rtp, rtsp, jump to external windows app
Pre-alarm per device for SDK integrations.

**CAM Premium**

All in CAM module plus the following:
.CAM Listener for direct Hikvision and Dahua device alarms.
.Reference images tool in selected MCDI Viewers.
.SDK Integration: Dahua, Focus H&S, Hikvision, IDIS, TVT, Vivotek.

**Interface Communication and alarm receiving**
Bosch CBS, CAMECT, Crow Cloud, Davantis DAVIEW, EBS OSM Vision, EPCOM Cloud, Frontel Videofied, Hanwha Wisenet, Hikvision AXPRO, Manythings, Monitoreal, Risco Cloud, ULTINOUS, Visonic Visnap (with MCDI VOD) Visonic Power Manage. Subscription with third part services may be required, not included.

For SDK integrations (Devices to SECURITHOR):
Video feed recording
Pre-alarm opening (setting per device)
Screenshot capture on demand.
.External jump http link, rtp, rtsp, jump to external windows app
As courtesy, without technical support: Cubitech, Elmo, Hik-Connect, Hik-Proconnect, ONVIF, IDIS, TVT, Uniview.

Update of third part cameras, devices DVRs via Securithor update.
Some brands are offered 'As it is' without technical support or guarantee of fitness. Contact MCDI to get the camera matrix list

.WhatsAPP integration

.MVP Map View and Plans

**SECURITHOR Minimum Requirements**

To operate trial: Intel process i3, 8GB Memory, 50GB space on disk

To operate for production:
Contact MCDI as minimum requirement vary according to usage and traffic.

OS: Securithor user interface can operate under Genuine Windows 10 or 11, .net framework 4.6.2. required.

Server license: compatible with Genuine Windows 10, 11, 2012, 2016, 2019. Pro version recommended with latest update. .net framework 4.6.2 required.

**Email and SMS**

SMS notification works with third part compatible modem not supplied with Securithor. As of July 2022, 2 models are crecommended and supported: Lantronix M110 family and Mars-Commerce. Number of modems and gateway capacity must be sufficient to handle traffic generated by Securithor.

Email notification requires a third part compatible outgoing mail server not supplied with Securithor. TLS 1.1 and 1.2 required. Server capacity per second/minute/hour/day must be sufficient for traffic generated. No write/read receipt management.

**MVP MAP VIEW AND PLANS**

Optional plug-in Module for SECURITHOR. A Prog1 product.

Minimum requirements:

Windows 1 pro , 11 Pro 64 bit

For display of maps: recent quad i7 with fast video card.

16GB RAM, 8GB Memory dedicated to video.

SSD disk with write speed over 1000MBps.

Access to camera tributary of SECURITHOR cam license and viewer.

MVP is not intended to process large volume of alarm signals. Securithor traffic should be preferred for this task. Map display requires maintaining a Securithor support plan.

**Push Notification/Verification Service: VERIFICATHOR**

Product designed and maintained by tech partner Prog 1

Connects SECURITHOR to Push Notification system by Apple, Google.

Yearly service by Prog 1.

Requires stable and continuous internet connection to Prog 1 server.

Bandwidth according to traffic.

VERIFICATHOR app available for Android and iOS (iPhone and iPad).

Provisioning via STnet for ARC identification.

2 service levels: Notification (one way) and Verification (2 ways).

## EXPRECIUM D - DECRYPTA4 pstn receivers

Products discontinued as of May 2023

**Communications (Ed and D4)**

2 RJ11 type jacks for connection of phone line

Type: Pulse, DTMF, FSK

Reception Speed: 10, 20, 40 pps DR / CS

Handshake and Kiss-off: 1400Hz /2300Hz/2225Hz

Pulse Frequency: 1800Hz / 1900Hz

**Reception Formats supported (Ed and D4):**

Acron Radionics 6500
Ademco: Radionics extended
- Slow/Fast; Sescoa Slow, Super Fast
- Contact ID; Sescoa Standard
- Extended; SIA
- Express; Silent Knight Slow
- High Speed; Stratel
FBI Super Fast Napco Point ID
3x1 BFSK,CFSK, VFSK)
4x1 3x1 extended
4x1 extended compressed 4x2
4x2 4x1 extended compressed 4x2
MC42 Zero removed 3x1, 4x1, extended.
Optex's Varitech C&K; Bell 103A2
All boards are delivered with Bell 103 on both lines.

**Reporting protocols to Automation Software**

Output as MCDI, SG MLR2 or Ademco 685. Some formats are not available to all reporting protocols.

**Printer Output:**

Exprecium D supports Epson T Family POS printer through Serial communication. Designed for Epson T88V USB and Epson LX 300 families. Converters not supported.

**Power Requirements:**

From computer +12V Supply: 225 mA typ.

From 12V Battery (standby): 225 mA typ.

**Station Requirements:**

PC chassis with 12V electrical supply though PCI or PCI-E bus with full length PCI or external 12Vdc power supply
Signal: USB 1.1/2.0/3.0 or Serial port.
Configuration tool : PC running OS allowing installation of .NET 3.5 such as Windows XP, 2003, Vista, Server 2008r2, 2012, Windows 7, 8. 8.1 and 10.

**DECRYPTA 4 phone line receiver**

**Power Requirements:**

Auto reboot upon power restore. From 9-12V DC Battery/ Power Supply: 250mA with fall-over management. Included power supply: 96-240V auto-ranging. IEC13 power cord to wall outlet. Energy saving automatically switches LCD backlight when switching to battery.

**Relay**

D4 is fitted with an internal relay to trigger externally powered devices such as a visual indicator, strobe light or siren. Terminal posts, dry contacts, on D4 back for normally open and normally close positions. Relays triggered each time an alarm signal is received by D4. Relay maximum current 30VDC 1A max.

**Station Requirements**

D4 can be configured and operated without PC by menus on front display in English, French, German, Italian, Portuguese, Russian and Spanish.

Configuration by PC through USB or serial port. PC configuration tools requires installation of Microsoft .NET 3.5 framework supplied on D4 CD. PC configuration tool in Arabic, English, Farsi, French, Italian, Portuguese, Russian and Spanish. POS printer of compatible with Epson T family . Designed to use with Epson T88V.

Caller ID service must be provided by Telco (Bellcore type 1 or compatible ETSI types) for Calling phone number to display.

**Warranty** Exprecium d and D4 are covered by a one year limited warranty. PSTN signal integrity must be sufficient for signal analysis by receiver. No troubleshooting offered for onsite phone lines. Certification in controlled environment offered when returned post paid to MCDI.

**DRIVERS AND COMMUNICATION**

USB drivers supplied 7, 8, Server 2012. Serial communication with DOS, Linux, and Windows. D4 can be configured and operated without PC or with PC using OS with .net 3.5 enabled.

Warranty period: 1 year limited warranty for Ed and D4.

Programming updates are free during the warranty period. Power surges from phone lines are specifically excluded. Wired pstn phone line required on both signal sending and receiving ends. Requires signal integrity at receiving end. Individual signal quality troubleshooting not performed nor provided by MCDI.

Rohs compliant, FCC, IC, CE, TBR21, EN50136

All requirements are subject to change without further notice. Some requirements should be adjusted according to usage. Minimum requirements may be higher if usage differs from standard operations. Consult MCDI to validate operational requirements.

All requirements are stated for stand alone operation or MCDI products without sharing resources with other applications or equipment.

All software products specifications are made with assumption that a genuine Windows OS is used, maintained and updated.

All software products require admin user and a standard Windows without modification of registry, configuration and security level.

All specifications valid for equipments and software made after August 2022.

MCDI SP products are also sold directly  
in many countries where MCDI SP is not  
represented. Contact us at:  
sales@mcdi.com  
+514-481-1067

BECOMING A MCDI DEALER:  
We are currently looking for resellers in  
several countries. If you think your orga-  
nization can benefit from reselling MCDI  
SP products, contact us with a brief  
presentation of your company, your local  
market and products you already repre-  
sent at: dealership@mcdi.com
